1. About Access**FIX**

AccessFIX is a powerful MS Access file recovery software and undelete utility. Since its initial release in 2002, AccessFIX has achieved overwhelming success and has been purchased by some of the largest corporations in the world. To maintain the program's fantastic reputation, Cimaware Software strives to constantly update and improve AccessFIX to provide clients with the most complete protection against Access data loss. AccessFIX, and all Cimaware Software products, comply with ISO 9001:2000 industry standards.

2. Description

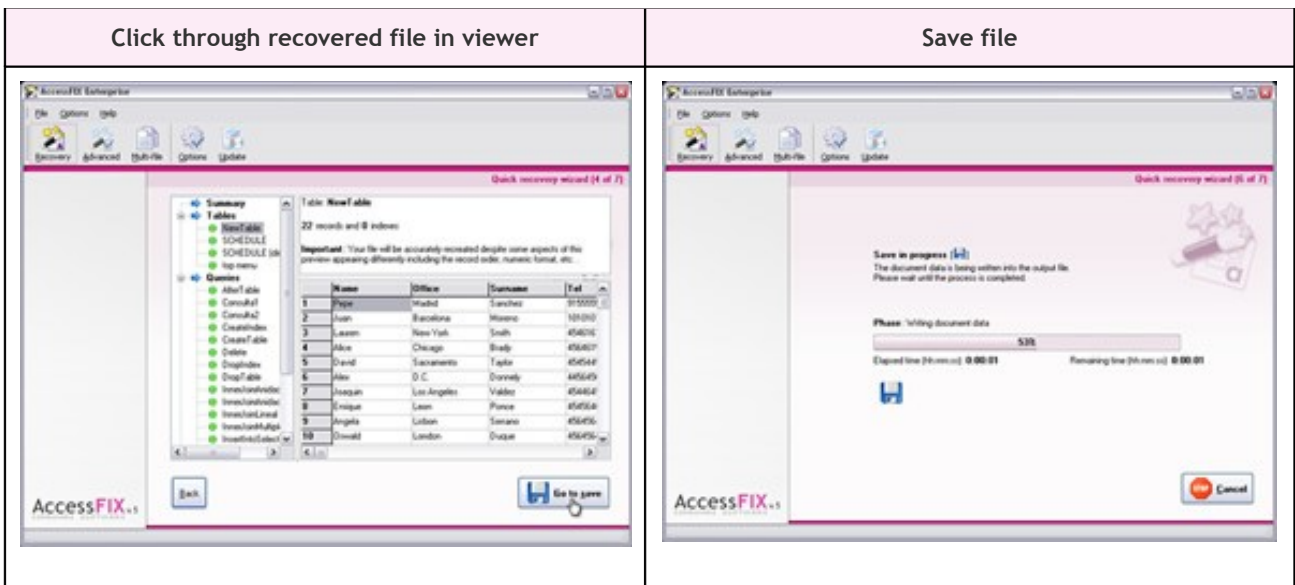

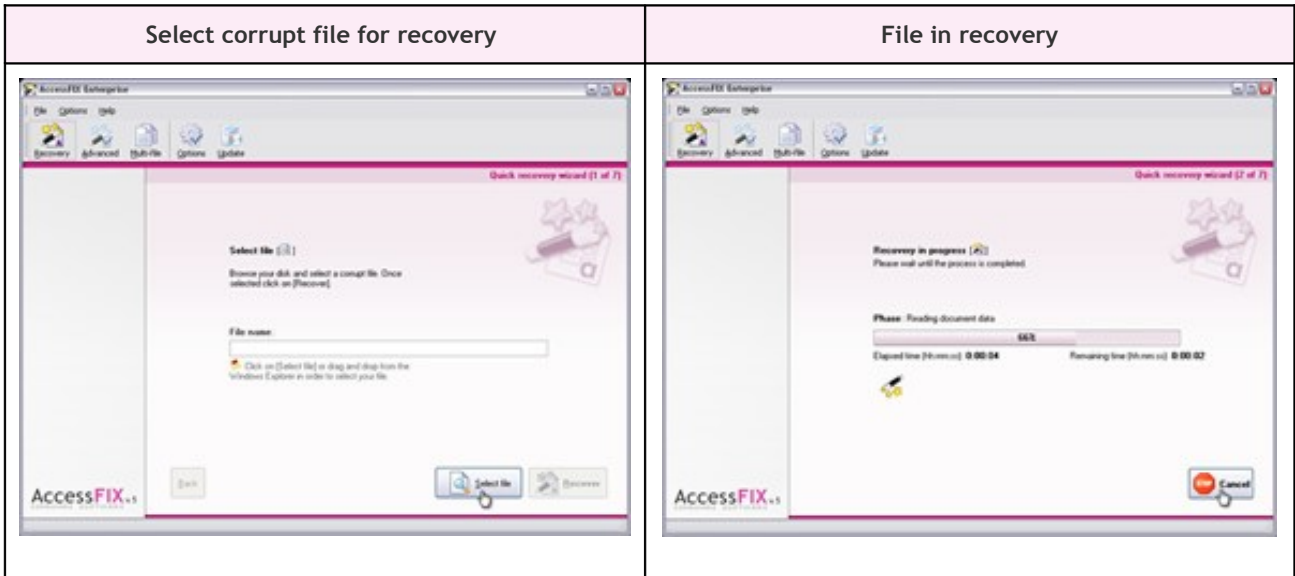

AccessFIX quickly recovers corrupt files by extracting the data and saving it into new and trouble-free file. AccessFIX supports MS Access 95, 97, 2000, XP, 2003 and 2007.

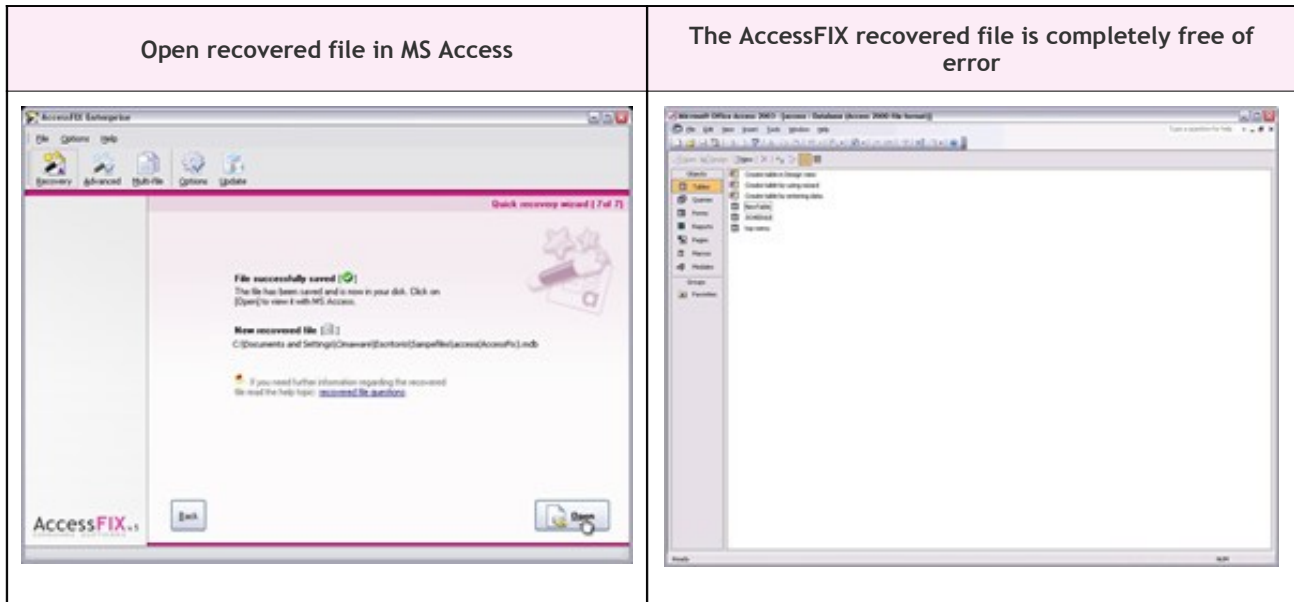

The program is available in a free demo download from the Cimaware Software website. This edition allows the user to diagnose their corrupt file and evaluate the recovery capabilities of the program. The view screen will allow the user to click through and assess the recovered file before purchasing the full edition of the program. This click through includes viewing table information, macros, forms, modules and reports.

The purchased editions of AccessFIX available are PRO and Enterprise. The AccessFIX PRO recovers macros, modules, forms, reports, indexes, relations, queries, as well as MEMO, OLE, replicas ID, decimal and autonumeric fields. It can also recover deleted records from a table. AccessFIX allows for the use of a back-up copy to more fully restore table definitions if so required. The Enterprise edition recovers these same elements and incorporates a Batch Recovery feature that allows for the simultaneous recovery of multiple corrupt databases. With the full edition the user will be able to decide if they wish to save deleted items. The demo edition of AccessFIX can be configured into either of the two editions for evaluation.

3. How It Works

The intuitive user interface makes file recovery a simple task even for the novice user.

4. How to Purchase

We understand that time is crucial in the event of data loss. For this reason we have created a streamlined ordering process in which clients can have access to AccessFIX within minutes, at any time and from anywhere in the world.

Orders can be placed with a credit card (Visa, Master Card or American Express) over our secure order site. Within 10 minutes the user will automatically receive an email containing the instructions to download the fully functional program from our server.

We also accept payment via bank transfers and purchase orders and have resellers in more than 50 countries. Please contact a customer service representative for more information at sales@cimaware.com

5. New

In order to provide our customers with the best possible protection against data loss, we are always updating and improving all of our products. AccessFIX is in constant development and new versions are released on a monthly basis. Our programmers are currently working on the next major release of the software which will further improve its recovery capabilities.
