## 1. About Office**FIX**

The OfficeFIX suite is available in five different combinations designed to meet the specific data recovery needs of our clients. OfficeFIX Platinum, the most complete suite, includes all of our file recovery software: AccessFIX, ExcelFIX, WordFIX and OutlookFIX. The OfficeFIX Gold suites offer three different combinations of AccessFIX, ExcelFIX, WordFIX and OutlookFIX. Each Gold suite contains three programs. The OfficeFIX Silver suite contains ExcelFIX, WordFIX and OutlookFIX.

Since the suite's original release in 2002, OfficeFIX has attained great success and has been purchased by some of the largest corporations in the world. To maintain OfficeFIX's excellent reputation, Cimaware Software strives to constantly update and improve all of the constituent programs to provide clients with the most complete protection against MS Office data loss. All Cimaware Software products comply with ISO 9001:2000 industry standards.

## 2. Description

OfficeFIX is available in a free demo download from the Cimaware Software website. This edition allows the user to diagnose their corrupt files and evaluate the recovery capabilities of the programs. The view screen will allow the user to click through and assess the recovered file before purchasing the full edition of the program (in the case of AccessFIX, ExcelFIX and OutlookFIX) or click through the saved recovered document (although partially covered by the word DEMO in the case of WordFIX).

All of the OfficeFIX combinations (Platinum, Gold and Silver) are available in both PRO and Enterprise. The OfficeFIX demo can be configured into PRO or Enterprise mode for evaluation. Depending on the specific suite, OfficeFIX will include some or all of the following products:

**AccessFIX:** Both the PRO and Enterprise editions recover macros, modules, forms, reports, indexes, relations, queries as well as MEMO, OLE, replicas ID, decimal and autonumeric fields. AccessFIX can also recover deleted records from a table. The advanced recovery section allows the user to attach a backup copy to restore table definitions if so required. With the full edition the user will be able to decide if they wish to save deleted items. The Enterprise edition includes an extra Batch Recovery feature that allows for the simultaneous recovery of multiple files.

**ExcelFIX:** Both the PRO and Enterprise editions recover basic file information including formulas, texts and the multi-sheet structure of the file as well as formats including: column widths, row heights, colors, fonts, borders, numbers, date and time formats, charts, pictures, embedded objects, comments, merged cells, outlines and "Lost String" corruptions. The Enterprise edition includes an extra Batch Recovery feature that allows for the simultaneous recovery of multiple files.

**OutlookFIX:** Both the PRO and Enterprise editions restore emails, contacts, calendars, notes, tasks and attachments as well as previously deleted items. Password protected files (that are not encrypted) are recovered. OutlookFIX allows the user to limit the size of the .pst and split it into various files in order to avoid future corruption due to MS Outlook's 2GB limit. The Enterprise edition includes an extra Batch Recovery feature that allows for the simultaneous recovery of multiple files.

**WordFIX:** Both the PRO and the Enterprise editions recover text (including Eastern languages and special characters from Latin-based and Germanic languages), table data, embedded HTML and basic document formattings well as headers and footers; images, charts and drawings; table of contents and glossaries; hyperlinks and bookmarks; and page, paragraph, font and style formatting. The Enterprise edition includes an extra Batch Recovery feature that allows for the simultaneous recovery of multiple files.

### 3. How It Works

OfficeFIX's intuitive user interface makes file recovery a simple task even for the novice user. The recovery wizards in all of the programs make file selection, recovery, viewing and saving a matter of just a few clicks. We offer a video demonstration of file recovery in each of the programs on the Cimaware Software website in the OfficeFIX "How It Works" section: <http://devel.cimaware.com/main/products/officefix-platinum-howitworks.php>

### 4. How to Purchase

We understand that time is crucial in the event of data loss. For this reason we have created a streamlined ordering process in which clients can have access to OfficeFIX within minutes, at any time and from anywhere in the world.

Orders can be placed with a credit card (Visa, Master Card or American Express) over our secure order site. Within 10 minutes the user will automatically receive an email containing the instructions to download the fully functional program from our server.

We also accept payment via bank transfers and purchase orders and have resellers in more than 50 countries. Please contact a customer service representative for more information at [sales@cimaware.com](mailto:sales@cimaware.com)

### 5. New

In order to provide our customers with the best possible protection against data loss, we are always updating and improving all of our products. OfficeFIX is in constant development and new versions are released on a monthly basis. Clients are alerted to new available versions from within the program.
